## MUUNDO

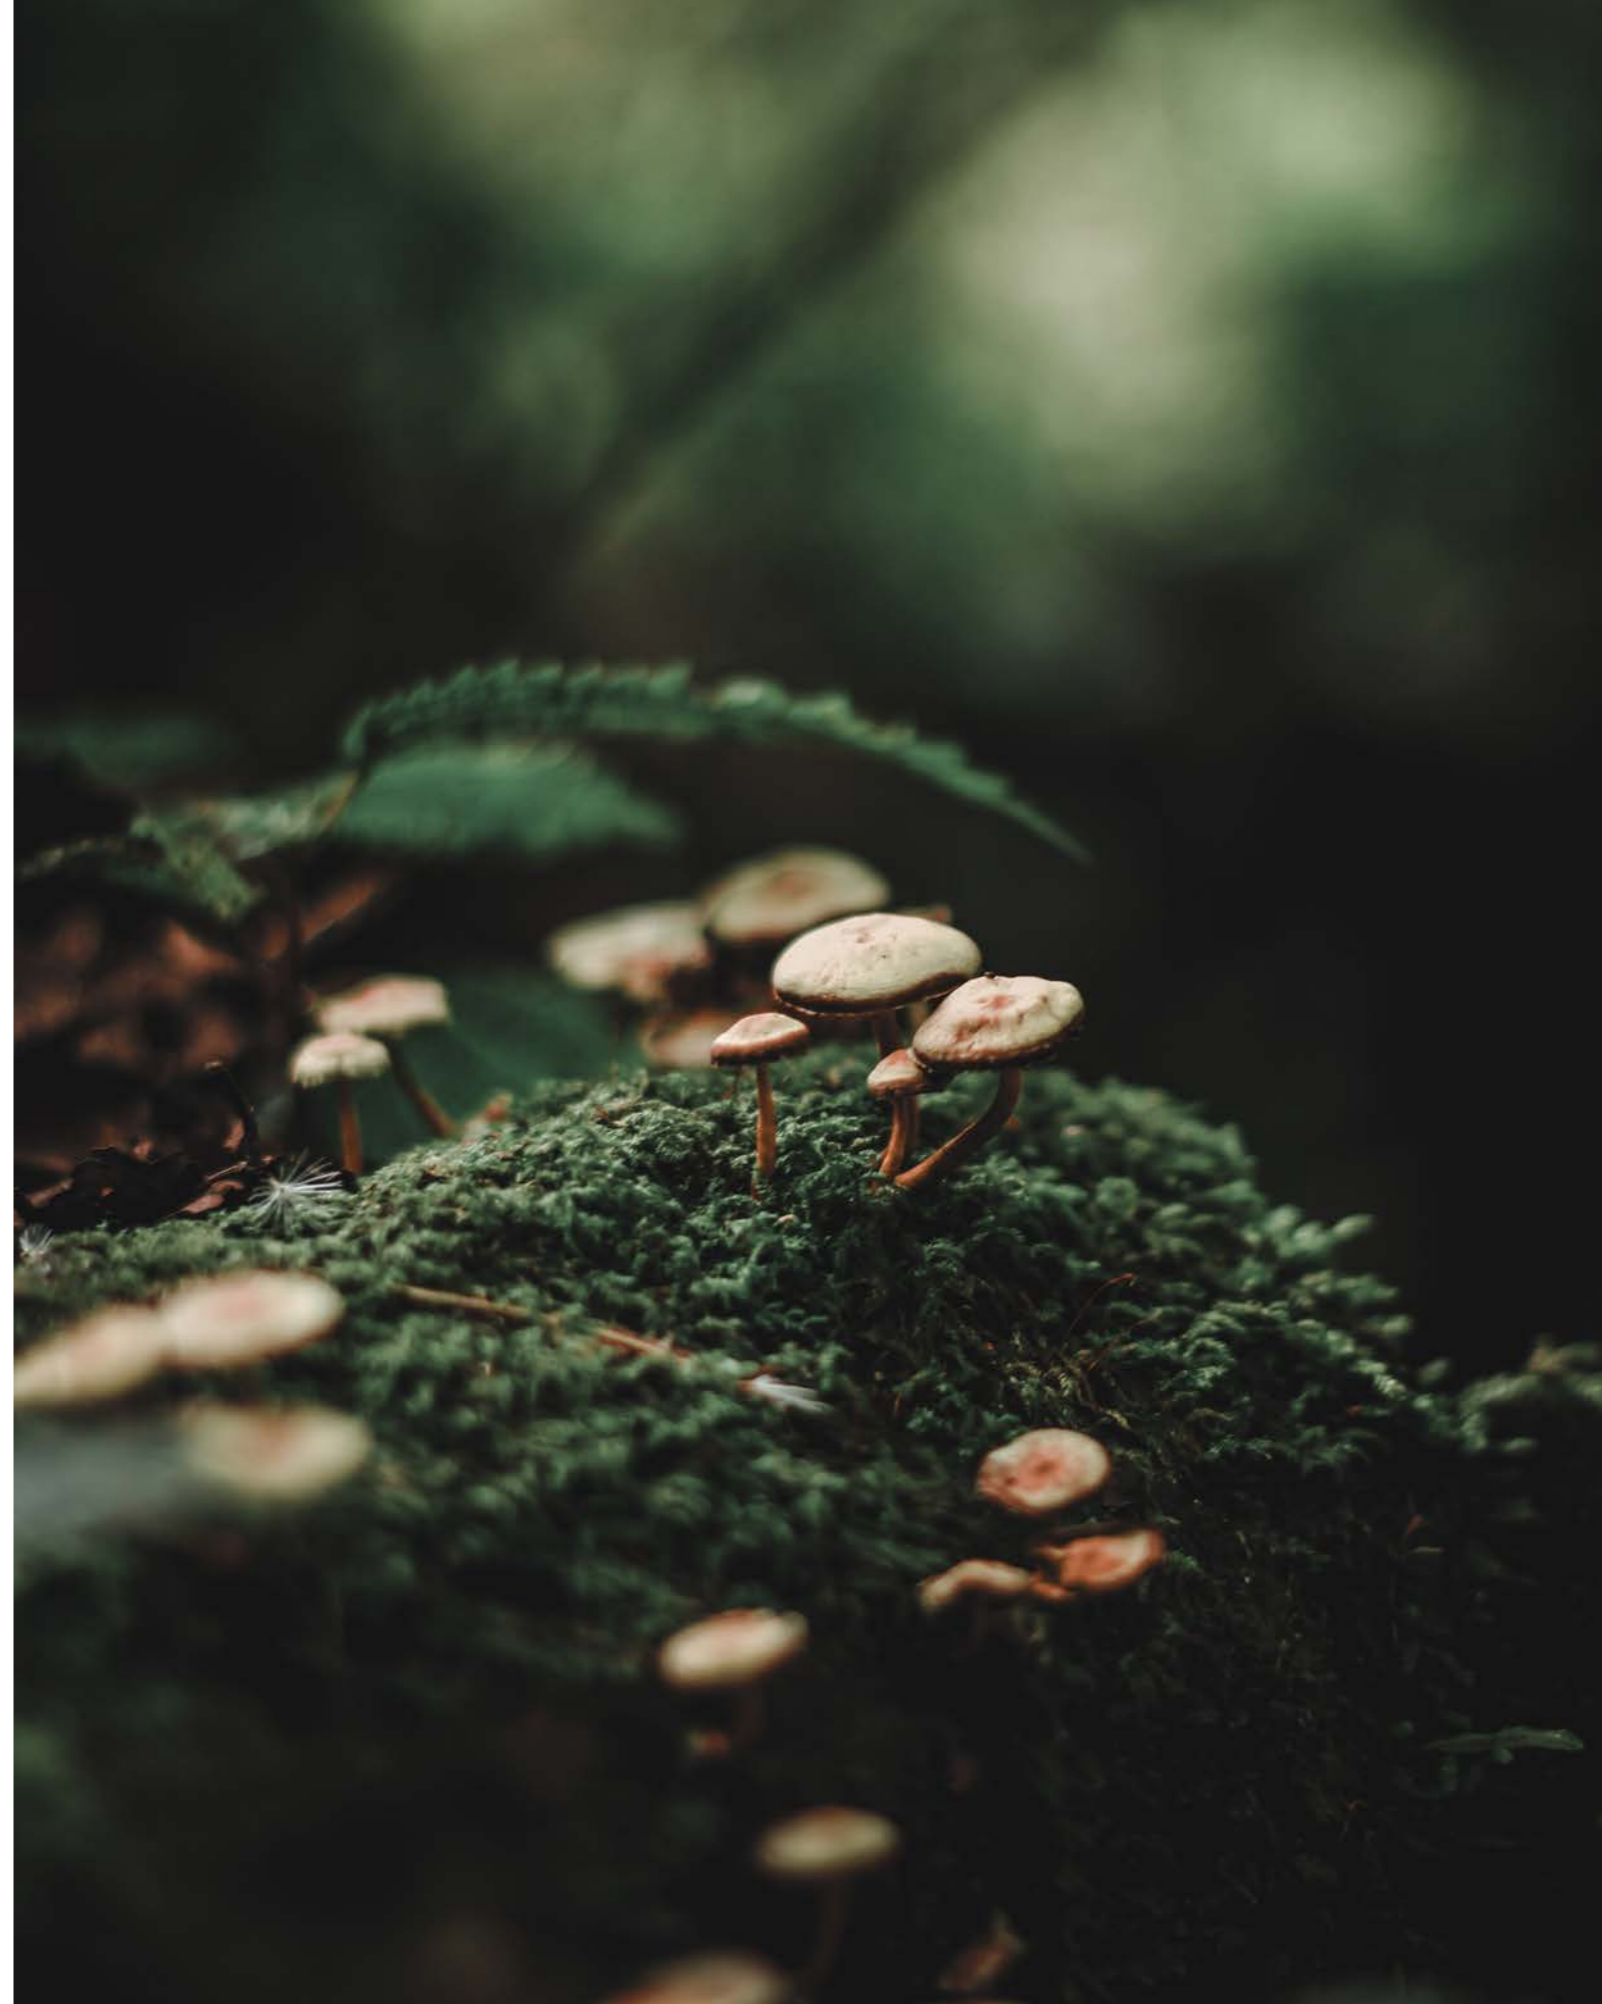

*A table collection inspired by nature.*

A table collection inspired by the tactility of textures we encounter in our surroundings. Every environment is characterised by its typical texturised elements. This uniqueness can be found through the handcrafted collection. The beauty of nature is reflected in each table through the soft and organic forms.

## DISCOVER NATURE

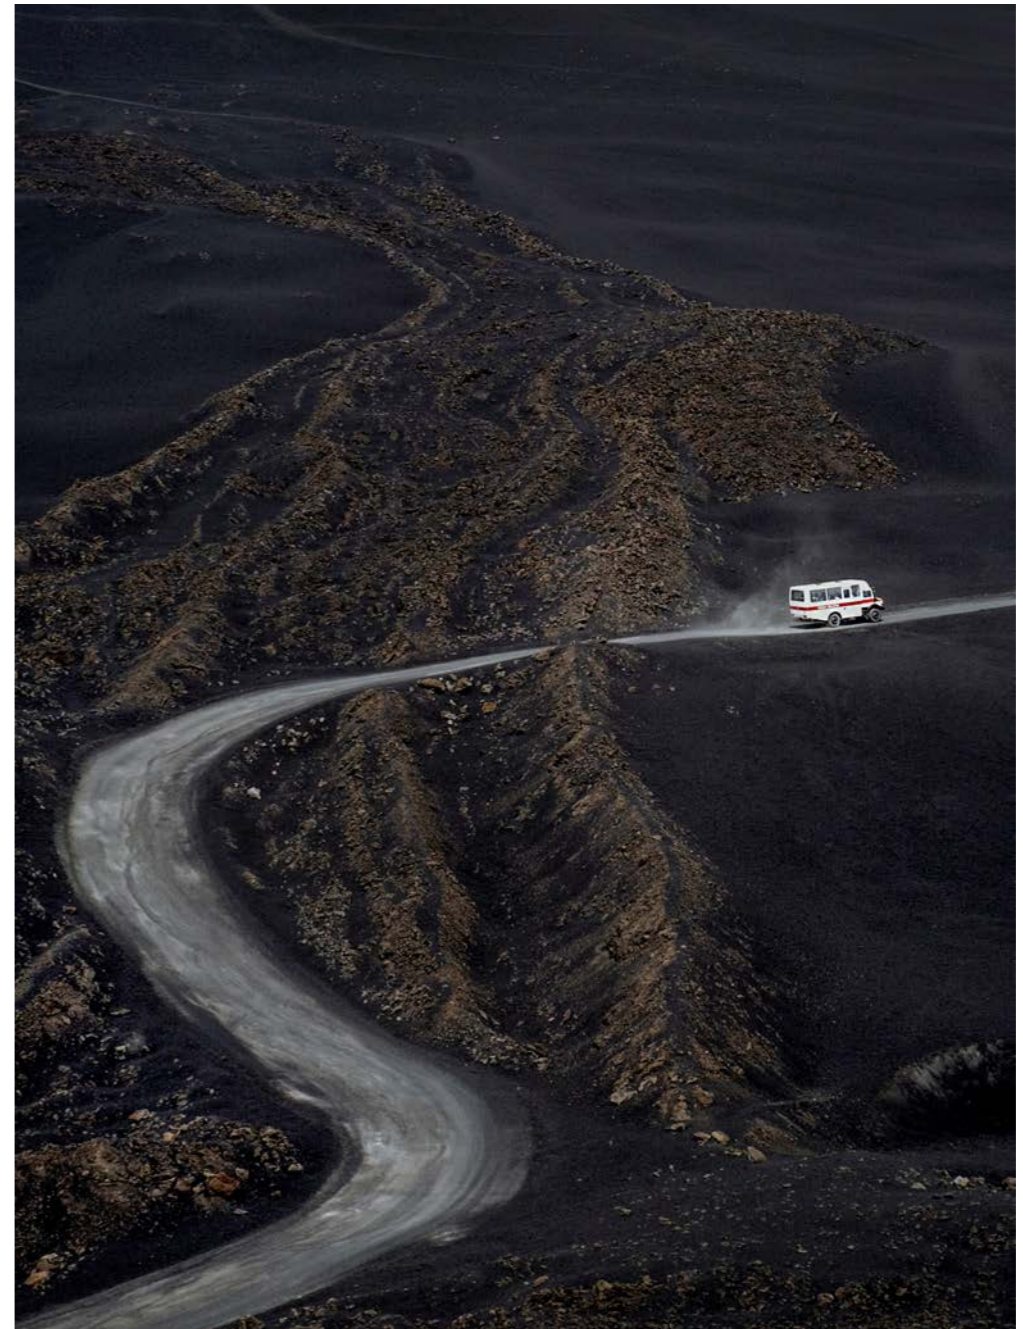

While designing the collection, we were inspired by the different natural phenomena that appear in our environment. A fascinating example are the different shapes wild mushrooms can take and how they are all soft and elegant in their appearance. We thought these shapes would be ideal to translate into a table collection.

Based on this inspiration, the Muundo collection has curved and round details with an imperfect surface finish as a tribute to nature.

INFO MATERIAL

# MATERIAL

Muundo is crafted from a composition of **minerals, lime and mortar**. Each piece is handcrafted which makes it one of a kind design.

The material is used for those who wish to combine **technicality, originality, personality and aesthetics**.

Used both for its technical qualities and its decorative advantages, it offers **interior and exterior** architectural projects a mineral appearance.

Thanks to its thinness and impermeability, the material **adapts to all shapes and surfaces**, offering an incomparable look to your showers, floors, pools, stairs and furniture.

The coating is manufactured in Belgium and is composed of **95% natural ingredients sourced in Europe**.

SUSTAINABLE

WATERPROOF

HEAT RESISTANT

# MAINTENANCE

**What is the difference between Muundo Indoor & Muundo Outdoor:**

The Indoor tables are covered with a varnish lacquer rather than oil finish.

The Outdoor tables are covered with an oil rather than varnish finish.

Keeping in mind above techniques being applied the Muundo Outdoor tables have a more rough surface suitable. Both application techniques serve as a protective layer that helps prevent staining, even though the tables are inherently waterproof.

The most suitable maintenance and care include the following steps for **Muundo Indoor** designs:

Regular Cleaning: Clean the tables using a mild solution of warm water and soft soap. Mix 1 to 2 tablespoons of soft soap in 1 liter of warm water.

Gentle Scrubbing: Use a sponge or cloth to gently scrub the tables while cleaning, avoiding abrasive materials or harsh chemicals.

For **Muundo Outdoor** designs we recommend additional steps as below instructed:

Annual Oil Application: Once a year, apply an oil finish specifically designed for Muundo outdoor furniture to protect the tables from staining. The oil can be directly purchased from Muundo.

Gentle Scrubbing: Use a sponge or cloth to gently scrub the tables while cleaning, avoiding abrasive materials or harsh chemicals.

Protective Covers: When not in use, consider using protective covers designed for outdoor furniture to shield the tables from direct sunlight, rain, dust, and other outdoor elements.

By following these maintenance instructions, you can ensure the longevity and appearance of your Muundo tables. Should you have any further questions or require any additional assistance, please don't hesitate to ask. We are here to help.

## DISCLAIMER

### **Care and Maintenance of Your Natural Table:**

This table is made from natural materials that lend it its unique and beautiful characteristics. However, it is essential to note the following care guidelines to ensure its longevity. Each table you purchase from us is handcrafted, showcasing the dedication and artistry that goes into its creation. Owing to the manual process of its application, the table may exhibit small imperfections, such as imprints left during application or varying shades on its surface. These nuances are a testament to its handmade nature and add to its unique charm.

### **Staining Risk:**

Like all natural products such as marble and wood, this table is susceptible to staining. While it can withstand spills from coffee, grease, and similar substances, immediate cleaning is required to prevent permanent marks.

### **Cleaning Instructions:**

To clean the table, gently wipe the affected area with a soft cloth and water. Do not use abrasive cleaning agents as they may damage the surface.

### **Coasters and Decor:**

We recommend the use of coasters for drinks to minimize the risk of staining. Additionally, avoid leaving flower pots or any items that could trap moisture for extended periods.

### **Regular Maintenance:**

To maintain the table's appearance and protective finish, we recommend applying a new layer of oil every six months. The required oil can be ordered directly from our distributor.

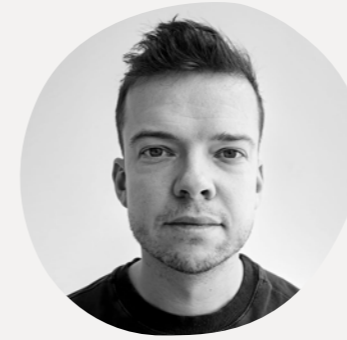

### **Warranty Void:**

Failure to follow these guidelines will void the warranty on the table.

## MEET THE DESIGNERS

Furniture design is an art form that transforms functional pieces into stunning works of art. We would like to introduce two talented furniture designers who are pushing the boundaries of design.

*CAS MOOR*

First, we have Cas Moor. He is a Belgium designer who graduated in 2015 with a bachelor's degree in Interior Architecture and masters degree in Autonomous design. In 2014 Cas became an independent designer for various companies with his personal approach to design.

A good design for Cas is when an object is stripped down to its bare bones with the essence still intact. His pieces are both functional and aesthetically pleasing, making them a staple in contemporary homes.

*STEFANO PREVOSTI*

Next, we have Stefano Prevosti. He is a Italian designer who graduated in Industrial Design at the Design school in Denmark. In 2017 Stefano exhibited at Milan Design Week and the FSC Design Award in Copenhagen.

He is known for his innovative use of materials, combining traditional techniques with modern technology.

#### LEGAL NOTICE

The note, and in particular the recommendations relating to the application and final use of the products are provided in good faith and are based on the knowledge and experience acquired to date by the Company Muundo in connection with its products when properly stored and handled and applied under normal conditions. In practice, the differences between materials, substrates and specific site conditions are such that this information or any written recommendation or advice given does not imply any commercial quality guarantee other than the legal guarantee against hidden defects. Our responsibility cannot not be invoked in any way if the application does not conforms to our information. All data and information relating to suitability and application do not relieve the customer from the need to carry out his own checks and tests. All orders are accepted subject to our current General Terms and Conditions of Sale. Users must consult the most recent version of the note relating to the product concerned concerned, which will be handed to them on request.
